Product: Model W900 Washing Machine

I am writing for the third time about the washing machine delivered on 29 January. It has leaked from the base since the day it was installed. I have called your helpline four times. On the last call the agent told me an engineer would attend within 48 hours. That was eleven days ago and nobody has visited.

The water has now damaged the flooring in my utility room. I have attached photographs of the damage and a copy of the delivery note.

I want a manager to call me today. If I do not hear back I will take this to the consumer court.

Status: Open, no engineer visit completed.
